

CHESTERFIELD COUNCIL ON AGING

The Other Dementias

After a brief introduction to basic brain functioning, participants will learn about less common non-Alzheimer's dementia syndromes. Learn how to recognize them, why they appear the way they do and what the implications are for the individual and their caregivers.

Andrew L. Heck, Psy.D., ABPP will be presenting the program. He is a licensed clinical psychologist and Director of Psychology and Research Director at Piedmont Geriatric Hospital in Burkeville, Virginia. Dr. Heck's areas of clinical interest include dementia evaluation, decision-making competency and capacity, behavioral treatment, and ethics in working with the elderly.

Thursday, October 28, 2010

9:00—10:00 am

**Lucy Corr Village, Multi Purpose Room
6800 Lucy Corr Boulevard, Chesterfield**
